

Technical Consultant

1 ROLE DESCRIPTION

You will be joining an elite group of individuals charged with implementing and delivering all aspects of Wombat's Market Data Delivery Platform products. This role is entirely customer focused, delivering quality consultancy in all areas of the customer focussed lifecycle from conception, to architecture, implementation, optimisation and issue resolution. This role presents the ideal candidate with exposure to some of the biggest, most powerful financial institutions in the world today.

2 RESPONSIBILITIES

Key responsibilities will include but not be limited to the following:

- Working closely with Wombat customers and Wombat Sales to ensure a thorough understanding of requirements
- Working closely with the VP Engineering and senior technical staff on the production of estimations
- Engaging with customers to help plan deployment strategies and implement these
- Converting evaluations and trials to customer wins
- Working with the Technical Account team to expand Wombat's global footprint and reputation as a market leader
- Ensuring all customer issues are followed through and implemented to their satisfaction
- Providing world-class support
- Reconnaissance into customer needs, plans and future technology developments
- Contribute and authoring Wombat documentation, white papers and thought pieces

3 CANDIDATE CRITERIA

3.1 ESSENTIAL CRITERIA

- At least a second class honors degree in Computer Science, Software Engineering or Electrical and Electronic Engineering (or equally relevant subject)
- Track record of exceptional performance, high productivity and meeting tight deadlines
- Highly ambitious with a desire to become top industry professional
- Ability to multi-task and prioritize
- Strong awareness and interest in technology and engineering
- Superb problem solving skills
- Experience in working effectively within a team and on your own
- Excellent communication skills
- Excellent interpersonal skills
- Excellent organizational skills
- Desire and Flexibility toward traveling

3.2 DESIRABLE CRITERIA

- Experience in the deployment of network infrastructure software products
- Familiarity with messaging middleware, such as IBM's MQSeries or Tibco's Rendezvous
- Development experience in any language
- Strong Unix/Linux skills
- Knowledge of the Financial Software Industry
