Wombat Announces Feed Handler for ARCA FAST FIX

July 17, 2006 - Wombat would like to inform you that we have released a new FAST feed handler for the Archipelago Exchange's ARCABook Binary feed. FAST is a new market data protocol standard designed to compress and streamline market data transmission to reduce bandwidth costs and increase data speed.

For further information on ARCA Binary feed, including details on the FAST compacted ArcaBook feed visit: www.tradearca.com/marketdata/arcabook.asp [<http://www.tradearca.com/marketdata/arcabook.asp>]

The Wombat ARCA FAST FIX feed handler, which further extends our coverage of the North American market, is supported on all market data platforms supported by Wombat. A complete list of Wombat feed handlers is available on the web at: www.wombatfs.com/products/feedhandlers.htm [<http://www.wombatfs.com/products/feedhandler.htm>]

Wombat also provides connectivity to full orderbook data from other markets including INET, Bloomberg and NASDAQ through its low latency integrated platform and offers a suite of add-on components to enrich that data, such as, the Wombat SuperBook virtual orderbook aggregation server.

For more information, please contact us at: sales@wombatfs.com [<mailto:sales@wombatfs.com>]
