Wombat Announces Feed Handler for TSX Level 1

Nov 2, 2006 - Wombat has released its feed handler for Toronto Stock Exchange (TSX) Level 1, providing access to Canada's equity capital and energy markets. TSX Group owns and operates Canada's two national stock exchanges - Toronto Stock Exchange serving the senior equity market and TSX Venture Exchange serving the public venture equity market.

Toronto Level 1 (TL1) is a real-time service for listed senior equities that provides trades, quotes, corporate actions and index information from Toronto Stock Exchange. TSX Venture Level 1 (CL1) is a real-time service for listed junior equities that provides trades, quotes, corporate actions and index information from TSX Venture Exchange. The CL1 also includes trades and quotes for NEX; a new and separate board of TSX Venture Exchange that offers a new trading forum for listed companies that have fallen below TSX Venture's ongoing listed standards. Both TL1 and CL1 are available as a delayed service.

For further details on the TL1 and CL1 visit: www.tsx.com/en/data/products_services/real_time.html [http://www.tsx.com/en/data/products_services/real_time.html]

The Wombat TSX feed handler, which provides access to both TL1 and CL1 market data, is compliant with all market data platforms supported by Wombat. Market participants should also note that Wombat's feed handler for TSX Level 2 is currently ready for customer testing.

A complete list of Wombat feed handlers is available on the web at: www.wombatfs.com/products/feedhandlers.htm [<http://www.wombatfs.com/products/feedhandler.htm>]
