Wombat Announces Feed Handlers for Direct Edge and BATS PITCH

Nov 27, 2006 - Wombat has released feed handlers for two Electronic Communication Network (ECN) real time data feeds – Direct Edge and BATS PITCH.

The BATS Trading data feed allows users to receive full depth of book quotations and execution information directly via the BATS PITCH protocol. For more details on BATS market data visit: http://www.batstrading.com/subscriber_resources.php

Direct Edge, a wholly-owned subsidiary of Knight Capital Group, Inc., provides the ability to match trades in NASD National Market® and NASD SmallCap® securities. For more information on Direct Edge visit: <http://www.directedge.com/>

The Wombat BATS PITCH feed handler and the Wombat Direct Edge feed handler are compliant with all market data platforms supported by Wombat. Market participants should note that Wombat also provides connectivity to full orderbook data from other markets including Bloomberg Tradebook, Arca FAST, NYSE Arcabook and soon to be released NASDAQ ITCH 3.0. In addition, Wombat's low latency integrated platform offers a suite of add-on components to enrich that data, such as the Wombat SuperBook virtual orderbook aggregation server.

A complete list of Wombat feed handlers is available on the web at: www.wombatfs.com/products/feedhandlers.htm [<http://www.wombatfs.com/products/feedhandler.htm>]
